Features

Macspred Australia have been developing granule herbicide technology for over 25 years. Granule herbicides offer a number of benefits over liquid application.

The Benefits of Granules

- Simple, and easy to use
- Low user hazard
- Provides a range of choices to match your situation
- Provides a broad spectrum of weed control
- Available in bulk or shaker packs
- No need for water
- Drift hazards are minimised
- Rate of application can be quickly and easily varied
- Quicker to apply (on average 6 times quicker)
- Ideal for inaccessible areas
- More economical over the whole operation

Granules can be applied by aerial application, ground broadcast application or spot application through properly calibrated equipment. Talk to your Macspred representative about application.

Macspred Australia has also developed "controlled release" technology in some of its granule products giving greater control of herbicide and soil uptake.

The Macspred Industrial Granule range is a great alternative to liquid herbicide application on rail track and infrastructure sites or where extended bare soil areas are desired.

Available in ready to use 1 kg Shaker Packs or 20 kg bags

Macspred Industrial Granule Range

Product Name	Active Ingredient	Rate per hectare
 Velmac G Granular Herbicide	Hexazinone	20 kg to 50 kg
 Velmac CR Granular Herbicide	Hexazinone	25 kg to 50 kg
 Trimac GR Granular Herbicide	Terbacil/Sulfometuron	20 kg to 30 kg
 Enviromac G Granular Herbicide	Sulfometuron Methyl	7.5 kg to 30 kg
