Features

Macspred Australia have been developing granule herbicide technology for over 25 years. Granule herbicides offer a number of benefits over liquid application.

The Benefits of Granules

- Simple, and easy to use
- Low user hazard
- Provides a range of choices to match your situation
- Provides a broad spectrum of weed control
- Available in bulk or shaker packs
- No need for water
- Drift hazards are minimised
- Rate of application can be quickly and easily varied
- Quicker to apply (on average 6 times quicker)
- Ideal for inaccessible areas
- More economical over the whole operation

Granules can be applied by aerial application, ground broadcast application or spot application through properly calibrated equipment. Talk to your Macspred representative about application.

Macspred Australia has also developed "controlled release" technology in some of its granule products giving greater control of herbicide and soil uptake. The Macspred Forestry Granule range includes pre plant and post plant application in Pinus Radiata and Eucalyptus plantations.

Pinus Radiata Plantations

| Product Name | Active Ingredient | Pre Plant | Post Plant | Rate per hectare |
|--|-----------------------|-----------|------------|------------------|
|  Velmac G Granular Herbicide | Hexazinone | ✓ | ✓ | 9 kg to 19 kg |
|  Velmac CR Granular Herbicide | Hexazinone | ✓ | ✓ | 12 kg to 25 kg |
|  Velmac Plus CR Granular Herbicide | Hexazinone/Clopyralid | ✓ | ✓ | 12 kg to 25 kg |
|  Forest Mix Granular Herbicide | Hexazinone/Atrazine | | ✓ | 30 kg |

Eucalyptus Globulus, Regnans, Nitens

| Product Name | Active Ingredient | Pre Plant | Post Plant | Rate per hectare |
|---|-----------------------|-----------|------------|------------------|
|  Eucmix GR Granular Herbicide | Terbacil/Sulfometuron | | ✓ | 30 kg |
