Features

Macspred have developed a quality range of liquid and dry glyphosate products to suit a range of different applications and situations.

Macspred can assist you in getting the best out of your glyphosate by tailoring a vegetation management program to suit your situation. In certain situations glyphosate can be mixed with other products, such as Macspred Acidifier, to improve efficacy on hard to kill weeds.

Resistance management is also an important issue and Macspred can help you to address resistance by utilising an integrated approach to vegetation management.

Product Name	Active Ingredient	Pack Sizes	Aquatic Frog Friendly
